Chem-Met Services, Inc. is a licensed hazardous waste disposal facility accepting liquid industrial wastes for storage and disposal.

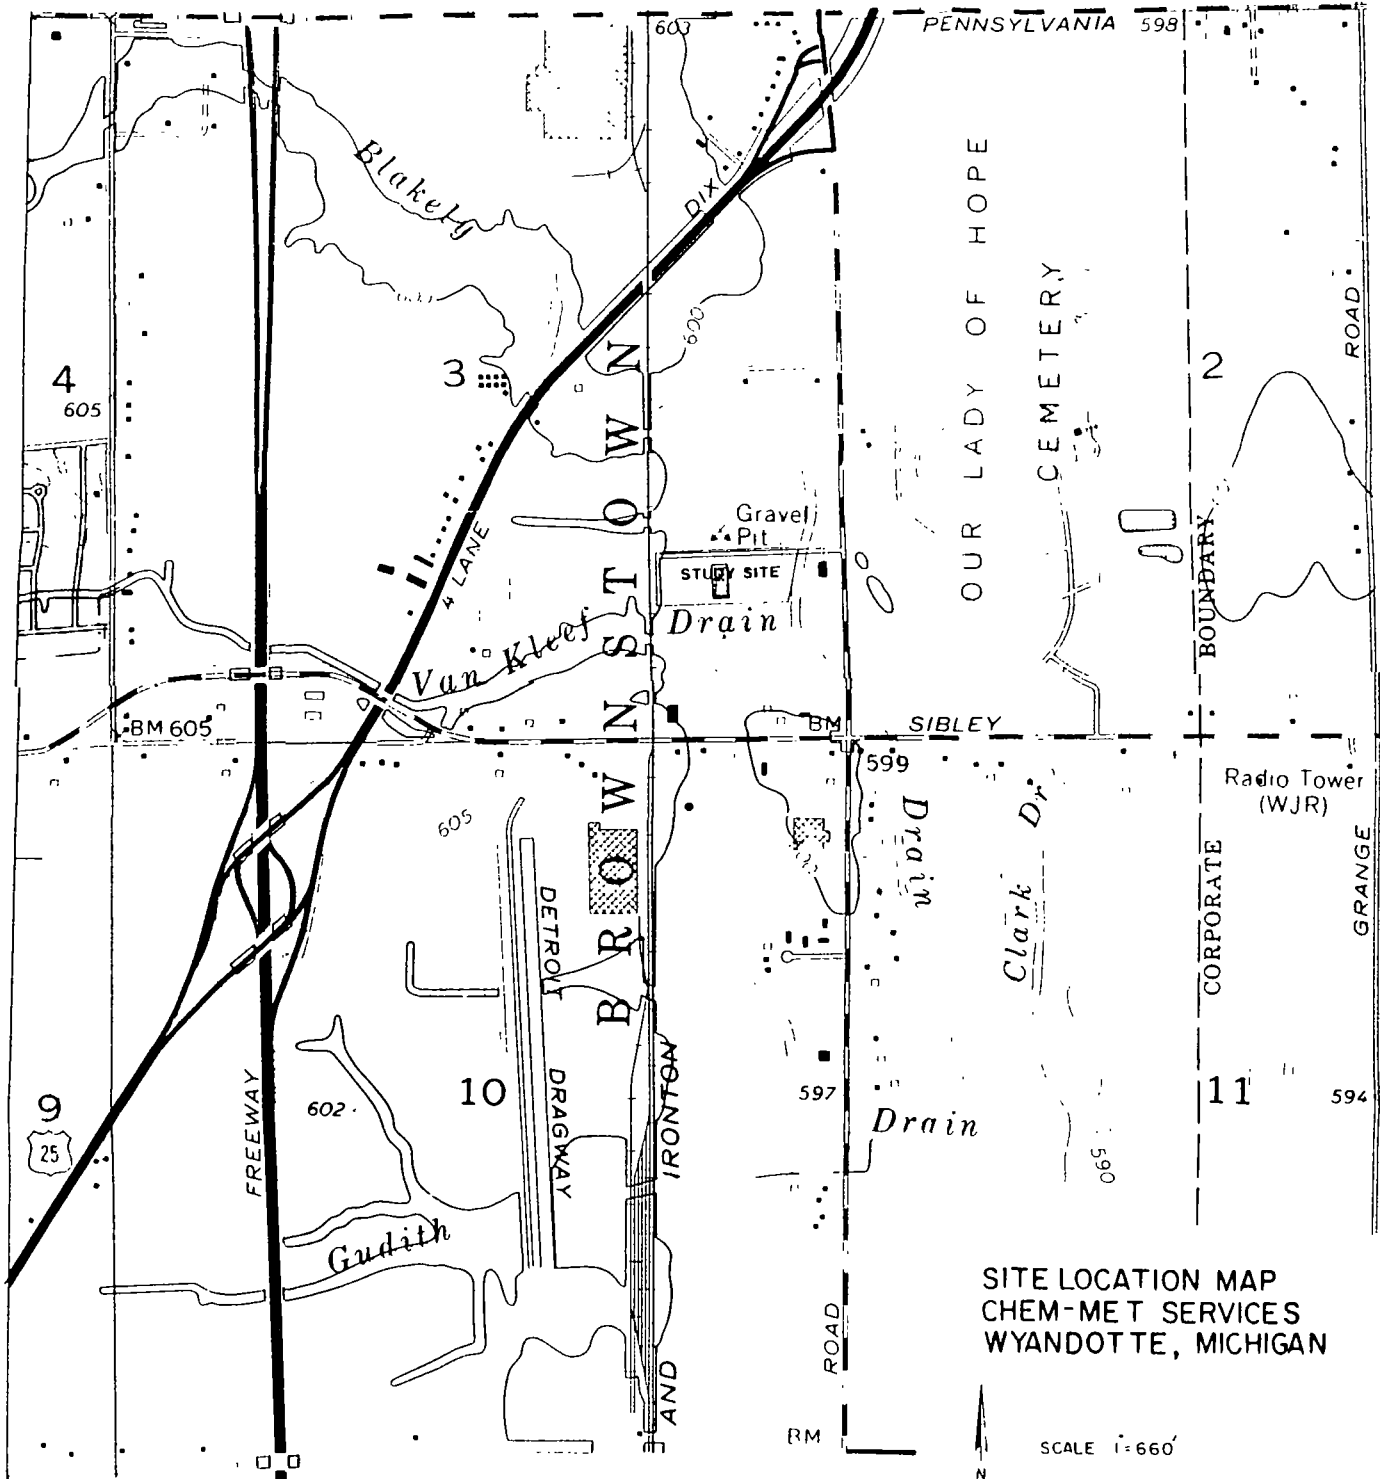

On November 7, 1980, Chem-Met Services, Inc. submitted a Part A permit to operate as a generator, a transporter, and as a treatment, storage, and/or disposal facility. The facility presently has interim status and has applied for a Part B permit. In a phone conversation with Rick Traub from U. S. EPA Region V, Mr. Traub explained that since Chem-Met's permit application, the state of Michigan has entered into a state compliance order for cleanup activities. This, in turn, should relieve Chem-Met from their RCRA obligation. However, as Jeanne Griffin of U.S. EPA Region V commented, until the agency officially notifies Chem-Met, their RCRA status will not be rescinded. Thus, the facility, Chem-Met Services, Inc., is exempt from CERCLA considerations.

For the aforementioned reasons, it is recommended that no further action be taken by the Field Investigation Team (FIT).
